Seattle, WA

Tech

Node.js | TypeScript | JavaScript | SQL (Postgres, Athena) | Claude | React | Vue | Redis | Elasticsearch
AWS Lambda | SQS | DynamoDB | S3 | CloudWatch | IAM | Secrets Manager | Step Functions | CodePipeline

Work Experience

Senior Software Engineer, Productiv, Inc.

Apr 2025 - Jun 2026

- Built and commercialized reports (~**15% ARR**) analyzing application usage, spend and contracts over **1B+** data points; led a team of 3 and a weekly customer sync to explain trends and drive adoption
- Engineered AI-powered tools to evaluate AI policy compliance (helped us land a massive prospect contributing ~**9% ARR**) and extract AI terms from contracts (helped us save ~**\$1M** in operating costs)
- Re-architected data product orchestration, eliminating **operational overhead** of 2 full-time engineers
- Optimized DynamoDB storage costs with a team of 4 reducing monthly expenditure by ~**77%**
- Developed client-side application search with hotkey support (~**90% customer adoption**)
- Designed and implemented a robust audit log aggregator with pagination support
- Pioneered data export and import APIs (~**40% customer adoption**, ~**220K weekly API calls**)
- Engineered a Productiv <> Dropbox contract integration (~**25% customer adoption**, ~**100K files synced**)
- Wrote several RFCs and customer-facing documentation on connector onboarding and API integration

Software Engineer III, Productiv, Inc.

May 2023 - Apr 2025

Software Engineer, Productiv, Inc.

Jun 2020 - May 2023

- Scaled user search to enable large enterprise deployments using Elasticsearch (**100x capacity increase**)
- Integrated with Okta's APIs to implement an SSO access management workflow, expanding workflow-supported apps in Productiv from 11 to **7000+**
- Introduced a new resource-based permissions model to increase users eligible for Productiv access by **23x**
- Launched manager level usage aggregation (~**70% customer adoption**)
- Increased automated E2E test coverage using **Selenium** and **Cypress** enabling semi-weekly releases
- Mentored 2 interns in projects such as adding support for multiple API client credentials, developer tooling using slackbots and employee surveys

Teaching Assistant + Research Aide, University at Buffalo

Dec 2019 - May 2020

Education

B.S. Computer Science, University at Buffalo

Aug 2016 - May 2020

GPA: 4.0/4.0

Awards

- 9x Hackathon Winner (Stanford, Princeton, SUNY Buffalo, UMichigan, Cornell, RIT)
- Best Poster Award (SUNY Buffalo)
- Top Student Contributor for 12 courses (Piazza)
- Grace W. Capen Award (SUNY Buffalo)
- Faculty Choice Award (SUNY Buffalo)
- Student in Technology Nominee (SUNY Buffalo)
- Inspirational Hacker Nominee (MLH)
- SUNY Chancellor's Award for Student Excellence Nominee (SUNY Buffalo)
