Experience

Clipboard

Software Engineer (Intermediate) Aug 2026 - Present

- Led a project to reduce break skipped rate by ~86% and eliminate break-related pay disputes
- Streamlined double shifts (~20% of all worked shifts) reducing relevant support tickets by ~70%
- Wrote AI agent skills to estimate project milestone completion dates and write weekly project updates

Productiv, Inc.

Senior Software Engineer Apr 2025 - Jun 2026
Software Engineer III May 2023 - Apr 2025
Software Engineer Jun 2020 - May 2023

- Built and commercialized reports (~**15% ARR**) analyzing application usage, spend and contracts over **1B+** data points; led a team of 3 and a weekly customer sync to explain trends and drive adoption
- Engineered AI-powered tools to evaluate AI policy compliance (helped us land a massive prospect contributing **~9%** ARR) and extract AI terms from contracts
- Re-architected data product orchestration, eliminating **operational overhead** of 2 full-time engineers
- Optimized DynamoDB storage costs with a team of 4 reducing monthly expenditure by **~77%**
- Pioneered data export and import APIs (~**40% customer adoption**, ~**220K weekly API calls**)
- Engineered a Productiv <> Dropbox contract integration (**~25% customer adoption**, **~100K files** synced)
- Integrated with Okta's APIs to implement an SSO access management workflow, expanding workflow-supported apps in Productiv from 11 to **7000+**
- Launched manager level usage aggregation (**~70% customer adoption**)
- Mentored 2 interns in projects: multiple API credentials, developer tooling and employee surveys
- Scaled user search to enable large enterprise deployments using Elasticsearch **(100x capacity increase)**

Education

B.S. Computer Science, *University at Buffalo* Aug 2016 - May 2020
GPA: 4.0/4.0

Projects

- Seattle Happy Hour Tracker | Perkfolio: Credit Card Perks Tracker | Other projects

Tech

Claude | Node.js | TypeScript | JavaScript | SQL | Postgres | Athena | React | Vue | Redis | Elasticsearch
AWS Lambda | SQS | DynamoDB | S3 | CloudWatch | Step Functions | CodePipeline | EC2 | Elastic Beanstalk

Awards

- 9x Hackathon Winner (Stanford, Princeton, SUNY Buffalo, UMichigan, Cornell, RIT)
- Best Poster Award (SUNY Buffalo)
- Top Student Contributor for 12 courses (Piazza)
- Grace W. Capen Award (SUNY Buffalo)
- Faculty Choice Award (SUNY Buffalo)
- Student in Technology Nominee (SUNY Buffalo)
- Inspirational Hacker Nominee (MLH)
- SUNY Chancellor's Award for Student Excellence Nominee (SUNY Buffalo)
